INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US04/18776

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Claims 1-20 YES
Claims NONE NO

Inventive Step (IS)

Claims NONE YES
Claims 1-20 NO

Industrial Applicability (IA)

Claims 1-20 YES
Claims NONE NO

2. Citations and Explanations (Rule 70.7)

Claims 1-20 lack an inventive step under PCT Article 33(3) as being obvious over Jordan. Jordan discloses a method and composition that is administered to diagnose and treat cancer. The method and composition comprise the injected stem cells that are targeted for damaged cancer tissue. The stem cells are tagged with antibodies specific to the damaged tissue. The stem cells comprise a corresponding imaging agent so that the diagnosis and/or treatment can be monitored via MRI. The targeted stem cells can comprise a linking moiety. The cells are administered intravenously, intraperitoneal, intramuscular, intracavity, subcutaneous, or transdermal. Although the reference does not teach the specific antibodies or stem cells it would have been obvious to one skilled in the art to provide the appropriate stem cells and antibody combination for treating the desired damaged tissue using the method of Jordan.

Claims 1-20 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
